SOLAR

Rein in energy costs and take control of your carbon footprint

Energy costs are rising rapidly and unpredictably, and you are feeling their effect on your bottom line. Some form of carbon emissions management is almost certainly in our future. A renewable energy installation could reduce your dependence on fossil fuels, but it would be capital-intensive and complicated. At the same time, you are concerned about the environment and impending carbon-tracking requirements, and you want to do your share to reduce your organization's impact. Your stakeholders and your community expect it of you.

Tioga EnergySM solves these problems with a SurePathSM Solar solution that provides you with a hedge against future energy price volatility. Tioga owns, installs and maintains a solar electricity system on your rooftop or property and, in exchange, you purchase the energy the system generates. A SurePath Solar power purchase agreement, or PPA, lets you focus on your core business. It takes care of everything, from system specifications to installation and equipment upgrades to guaranteed long-term rates. It lowers your costs and your carbon footprint at the same time.

Keep Energy Costs under Control

With Tioga Energy, your organization locks in long-term electricity rates, putting you in control as utility prices soar. Realize immediate savings on electricity costs and continue saving throughout the term of your SurePathSM Solar PPA. These savings come without any customer capital outlay because Tioga owns all the solar equipment.

Minimize Operational Impact

Tioga Energy and its installation partners manage the installation and maintenance of a solar facility and ensure its long-term performance. Let Tioga be your guide and single point of contact throughout the process of adopting solar energy.

Enhance Your Public Image

A Tioga Energy solar agreement highlights your company's long-term commitment to renewable energy and the wellbeing of the environment. If you are a building owner, adding a solar power system adds points toward a high Green Building rating, helping you attract quality tenants.

YOUR SURE PATH To Renewable Energy.

Our Customers

Customers of all types, no matter what their tax status, save on energy costs and reap real benefits from working with Tioga.

For commercial organizations, a SurePath power purchase agreement reduces the risk and complexity of installing a solar power system. In addition, Tioga maintains and monitors the system, allowing companies to focus on their core businesses.

Tioga passes the savings from rebates, accelerated depreciation and tax incentives to its customers through lower energy rates, allowing all organizations, including government and non-profit agencies, to enjoy the financial benefits of solar energy.

Tioga Quality

To assure the highest quality solar implementation, Tioga assigns a project manager who takes responsibility for every aspect of project planning and installation by a highly qualified Tioga installation partner, through to management of all the financial and regulatory details. The Tioga project manager provides a single point of contact and relieves customers of the hassle, risk and cost of overseeing the project themselves.

SurePath SolarSM

Tioga Energy's SurePath Solar power purchase agreements offer competitive energy rates guaranteed for the life of the agreement, which generally spans 20 years.

As part of SurePath Solar, Tioga:

- Assesses, designs, engineers and installs a solar power system on your rooftop or land
- Oversees installation of the solar facility
- Obtains regulatory certifications along with rebates and incentives
- Owns and assumes responsibility for maintaining and monitoring the equipment, assuring peak system efficiency

A SurePath Solar customer:

- Hosts (but does not own) the solar facility on the property
- Buys the solar energy produced by the solar facility at guaranteed long-term rates

Tioga Energy

Tioga Energy was founded to accelerate the adoption of renewable energy for commercial, government and non-profit organizations.

Tioga Energy's management includes top-tier executives with histories of success in the energy, finance, construction and technology industries.

Tioga Energy has large capital reserves through international construction and permanent financing organizations to support rapid project implementation and long-term stability.
